ABOUT ME

Hello! I'm Jose Centeno, a Web Developer with extensive knowledge of Frontend, and currently oriented to achieve the Full Stack profile. I'm passionate about technology and innovation issues. It's impressive to me to be part of the process of creating a project from its beginning, to see its evolution and how it takes shape until its completion. Sharing knowledge, being part of the team, and of this process is my group objective, and the constant improvement for personal and professional growth is my particular purpose.

EXPERIENCE

WEB DEVELOPER Argentina

Web Development Experience (Apr 2021 – Present)

I started this journey in April 2021 with training to be a Full Stack Web Developer, since then, I have taken specific courses to improve my knowledge in JavaScript and React. I have carried out collaborative and individual projects with different technologies to build static or dynamic websites, mainly using HTML, CSS, and JS for the Front. To give styles: Bootstrap 5. And BackEnd: in Node.js. Management of GIT, GITHUB, responsive design, and agile methodologies for group projects.

GENERAL ADMINISTRATION Argentina y Venezuela

Administration Experience (Since Sept 2010)

Being an administrator by profession, throughout my life I have held various administrative positions in transnational companies, which have allowed me to acquire and develop personal and professional skills empirically, such as adapting to changes, to different organizational climates, learning quickly new systems, meet group goals, among others.
